

Trapping

(In multicolor prints,
this is automatically applied)

Customer request, Provided data

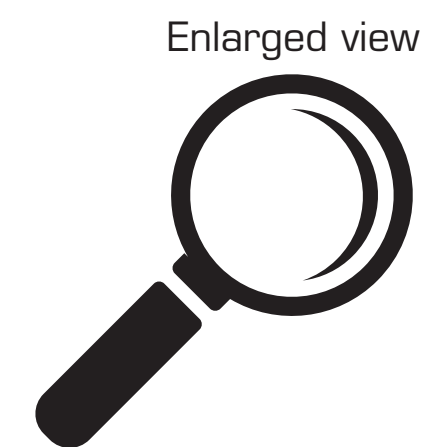

Incorrect

Without trapping = white gaps

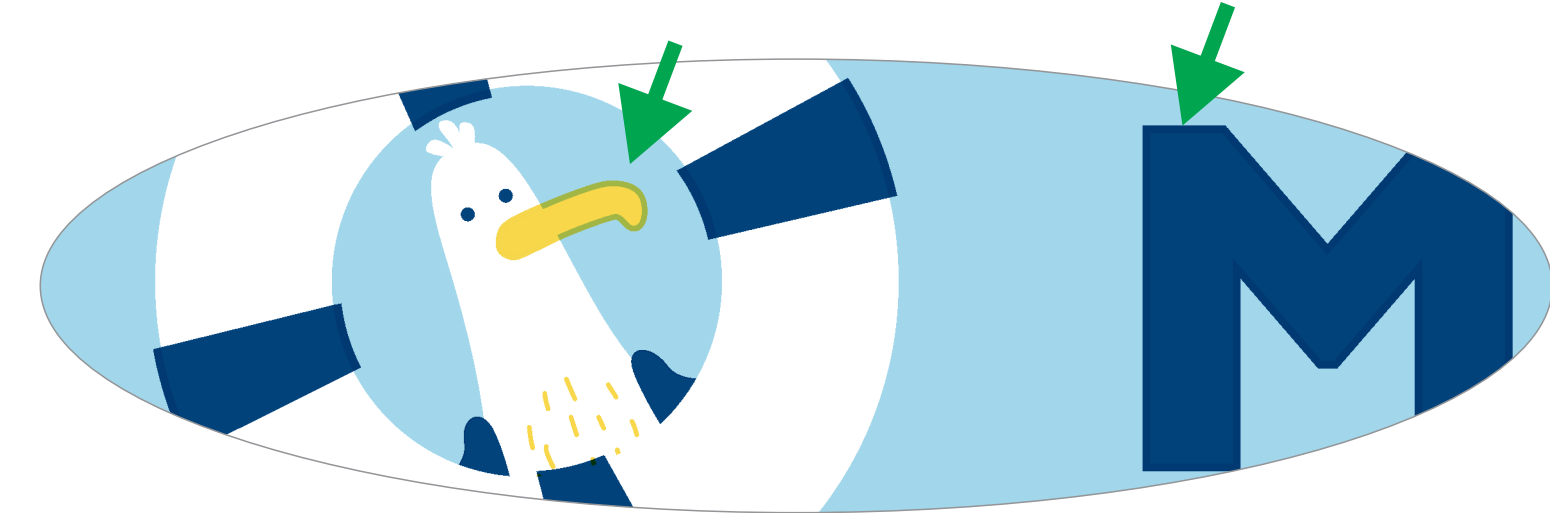

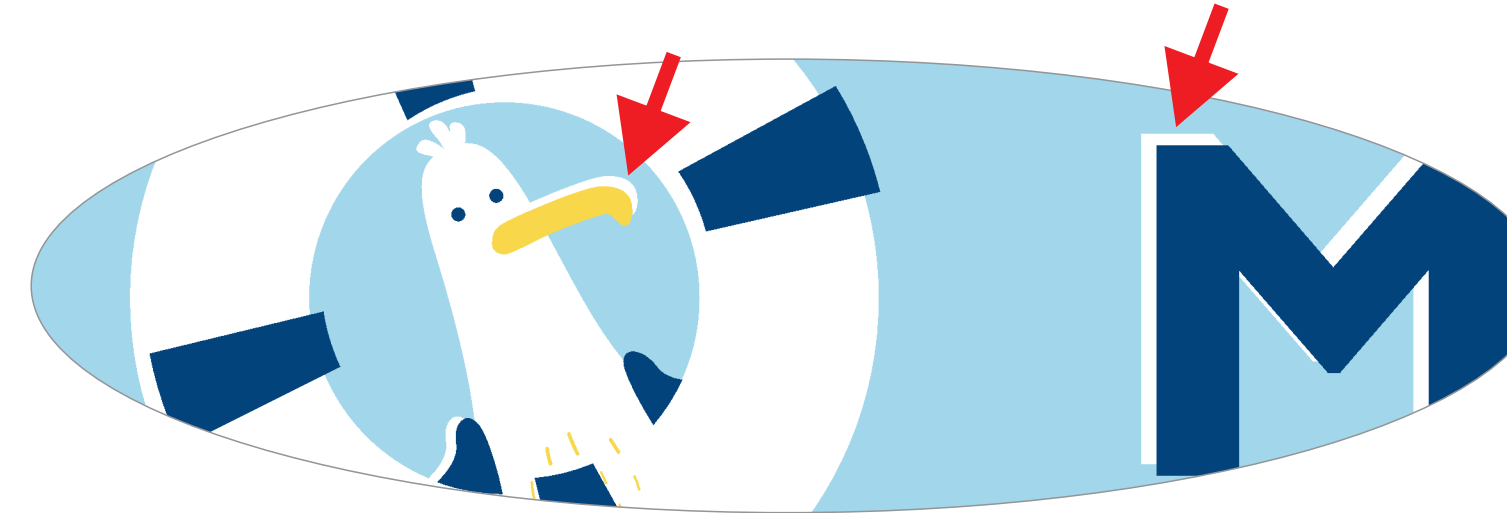

Correct

Trapping = Color Overlap
This refers to the overlap of colors to prevent white gaps from appearing.
The best results are achieved with a combination of light and dark colors.

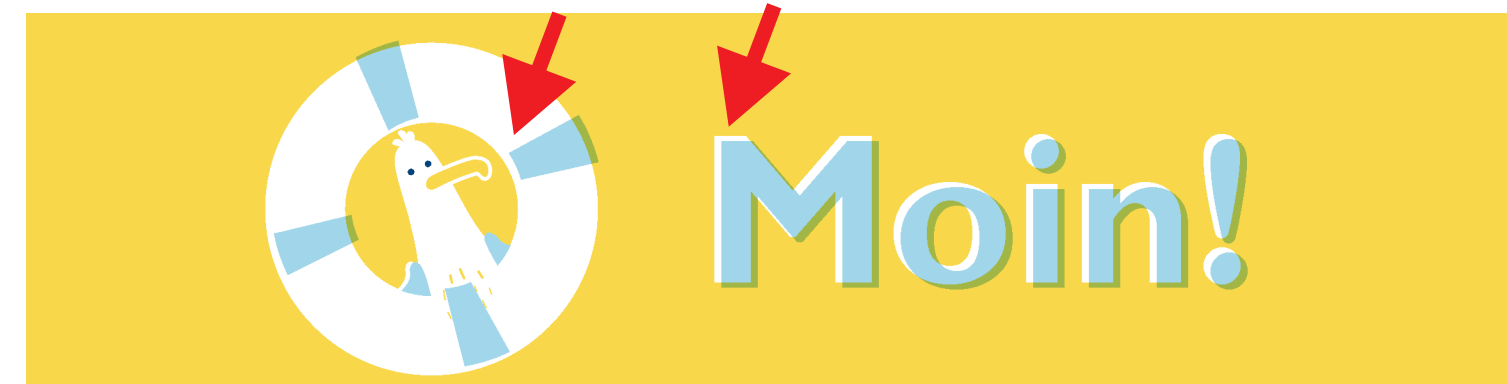

Without trapping = white gaps

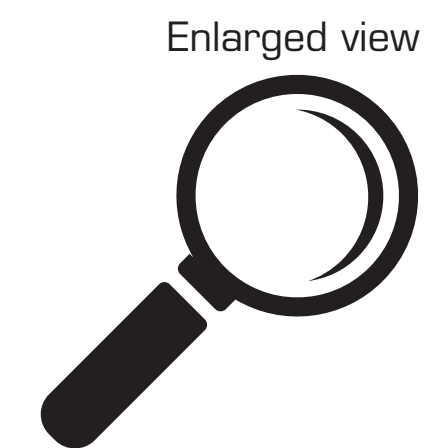

Customer request, Provided data

Without trapping = white gaps

With trapping, slight edges may appear with an unfavorable color choice (e.g., yellow/light blue).

Without trapping = white gaps
